NAMICS CORPORATION
Quality Assurance Division

Introduction

NAMICS engages in various activities under the following corporate philosophy: To achieve universal satisfaction and a prosperous natural environment through creativity and innovation.

One such activity is to develop sustainable societies. NAMICS recognizes the importance of continuing to create products designed with environmental aspects in mind—so-called eco-friendly products—in keeping with various social trends, including domestic and international environmental laws and regulations. Creating eco-friendly products is an increasing customer demand and a societal obligation.

To meet this demand, NAMICS must ensure that the raw materials, indirect materials, and other materials purchased by NAMICS help reduce environmental impact. The understanding and cooperation of its business partners are essential to this effort. In 2005, NAMICS established its Green Procurement Standards Document, which specifies the activities earnestly pursued with its partners to date. The Green Procurement Standards Document is now in its 19th edition. NAMICS asks its business partners for their continued understanding and cooperation with these efforts.

1. Basic policy

1.1

Environmental Policy

Surrounded by plentiful agricultural fields, NAMICS CORPORATION is located in the eastern part of Niigata-city which has beautiful lagoons and rivers flowing into the Sea of Japan. Since being founded over 60 years ago, it has been preserving the abundant surrounding nature. Moreover, having the keyword S.E.E.D.S. (Semiconductor, Environment, Energy, Device and System), it has concentrated on the research and development of insulating and conductive materials for electronic components, and contributed to upgrading our lives and cultures with its great variety of products. Setting the following Environmental Policies as the basis of its activities, NAMICS aims at the realization of coexistence and mutual prosperity of various relations, like the relationship between society and nature.

1. NAMICS sets the Environmental Management as one of its most important projects, and takes its expanding social responsibilities through continuous improvements of its Environmental Management System to improve the environmental performance.
2. NAMICS familiarizes all employees with its Environmental Policies and encourages them to be conscious of environmental problems and to contribute to society.
3. NAMICS observes the regulations on Environmental Management. It also strives for the international cooperation based on the guidelines of related organizations, associations or those with which NAMICS has common principles, uses sustainable resource use, mitigate and adapt climate change, and protect biodiversity and ecosystem. Furthermore it aims at the prevention of pollution and disasters, and safe operation.
4. Regarding the following environmental conservation activities as the focus, NAMICS performs these environmental programs.
 - 4.1 Energy conservation
 - 4.2 Promotion of 3Rs, Reduce, Reuse, and Recycle
5. In order to reduce the environmental impact from NAMICS' products, the following is carried out.
 - 5.1 R&D, and design of products where environmental impact can be limited to as little as possible
 - 5.2 Reduction of environmental controlled chemical substances in products and the replacement of them with alternatives
 - 5.3 To minimize amounts of packing materials
 - 5.4 To strive to use environmentally-friendly materials
6. NAMICS sets medium-term environmental objectives matching with Environmental policy based on the evaluation results on the impact which NAMICS may have caused. It also plans environmental targets for each fiscal year, makes concrete action programs based on them and performs them.

NAMICS CORPORATION
Toshinobu Odajima, President

Quality / Chemical in Product Management Policy

NAMICS has established the following Quality / Chemical in Product Management Policy. We then set annual, numerical targets based on these Policy and develop and implement company-wide improvement measures to achieve the Policy' goals. The aim of these activities is to reduce the number of defective products, both inside and outside the company, to zero.

- NAMICS will provide products which will fully satisfy customers with its unique and creative technologies in a timely manner.
- NAMICS continues to provide products that do not contain hazardous substances.

1. NAMICS shall be interested in customers' expectations and needs, ensure our products quality and chemical in product management by capturing their needs in advance through close communication, and achieve their trusts and satisfactions.

2. NAMICS shall meet customers' requirements for products and conform to statutory and regulatory requirements. NAMICS shall also continuously improve the effectiveness of Quality Management System and Chemical in Product Management System.

3. NAMICS shall establish Quality objectives and Chemical in Product Management objectives every fiscal year, implement them in each division, and consciously make efforts to improve products' quality including Chemical in Product Management. NAMICS shall check achievement statuses of Quality objectives and Chemical in Product Management objectives every month, and take appropriate actions if necessary.

4. NAMICS' Quality policy, Chemical in Product Management policy, annual Quality objectives, and annual Chemical in Product Management objectives shall be communicated to all staff members.

5. The adequacy of NAMICS' Quality policy, Chemical in Product Management policy, annual Quality objectives, and annual Chemical in Product Management objectives shall be reviewed at management review meetings held in November and May every year.

NAMICS CORPORATION
Toshinobu Odajima, President

2. Positioning of the NAMICS Green Procurement Standards Document

2.1 Objectives

To provide our customers with products that have low environmental impact **and comply with chemical substance regulations**, NAMICS has established the NAMICS Green Procurement Standards Document, a document that defines key issues in its relationships with business partners in the realm of materials procurement. In this way, NAMICS seeks to achieve green procurement.

2.2 Basic concept

NAMICS pursues partnerships with business partners with whom it can share **activities related to the Chemical in Product Management and** environmental preservation activities through the following efforts:

- (1) Promoting procurement from business partners who prioritize environmental measures.
- (2) Promoting the procurement of raw materials and indirect materials with low environmental impact.
- (3) Promoting the procurement from suppliers who implement appropriate Chemical in Product Management.**

2.3 Scope

The NAMICS Green Procurement Standards Document applies to raw materials, indirect materials, and other materials used to manufacture the products produced by NAMICS. The NAMICS Green Procurement Standards Document also applies to the parties supplying these materials.

2.4 Confidentiality

NAMICS does not disclose documents or data submitted to NAMICS by its business partners to third parties without prior approval. NAMICS abides by all laws, regulations, and other rules regarding the appropriate handling of confidential or personal information concerning or belonging to its business partners.

2.5 Revisions

The NAMICS Green Procurement Standards Document is subject to revision in response to changes in various domestic and international laws and regulations, social demands, and technological advances.

3. Definition of Terms

3.1 Raw materials, indirect materials, and other materials

These terms refer to products and materials produced by NAMICS business partners and procured by NAMICS for the purposes below.

(1) Raw materials

Materials used by NAMICS as direct constituents of NAMICS products

(Examples: resins, metal powders, glass flits, pigments, solvents, and additives)

(2) Indirect materials

Materials delivered to customers as NAMICS products, excluding (1) raw materials as defined above.

(Examples: packing materials, including containers, bags, corrugated board, buffer materials, tape, labels)

(3) Other materials

Materials purchased by NAMICS but not remaining in or contained after production in NAMICS products (finished products).

(Example: cleaning agents used in manufacturing processes)

3.2 Environmentally hazardous chemical substances and related matters

(1) Environmentally hazardous chemical substances
Substances satisfying all of the following conditions:

- 1) **Chemical** substances used by NAMICS as raw materials, indirect materials, or other materials in product manufacture
- 2) **Chemical** substances known to harm the environment or human health whose control is required under laws and regulations or self-imposed standards
- 3) **Chemical** substances specified in the related specification, “NAMICS Green Procurement Standards Environmentally Hazardous Chemical Substances List” (the latest version).

(2) Halogen-free

When things including halogen are incinerated, they often denature to hazardous substances, for instance, to generate dioxin. The movement to provide halogen-free products has been promoted in recent years.

NAMICS has been aiming at the increase of the ratio of halogen-free products and sets the threshold limits as follows in accordance with the IEC61249-2-21.

Cl < 900 ppm、 Br < 900 ppm、 Cl + Br < 1500 ppm

Though these criteria are not the requirements to our business partners, we require you to provide the latest halogen content information so that NAMICS sustains its operations and businesses.

3.3 Regulated substances, reduced substances and managed substances

(1) Regulated substances

- 1) Level 1: Regulated substances whose inclusion in items purchased by NAMICS at or above the threshold limit is not accepted.
- 2) Level 2: Regulated substances whose presence in products is permitted only if specific conditions are met, but the inclusion at or above threshold limit is prohibited like those classified as Level 1.

In the case that technical factors (for example, the absence of alternative materials) require the use of such substances; substances that are not classified as Level 1 regulated substances based on concentration rate, parts to which the substances are used, purpose, and abolition date due to the following matters:

- Laws and regulations
- NAMICS customer requirements
- NAMICS policy

(2) Reduced substances

Refers to substances whose potential classification to Level 2 in the future should be considered by following the trends of the social environment and/or laws and regulations though the immediate prohibition nor regulation of their inclusion is not required at this time. The substances whose inclusion in products should be avoided or reduced as much as possible.

(3) Managed substances

Refers to substances whose inclusion does not need to be prohibited nor regulated, but that require the knowledge of data on presence and, if present, the concentrations at which they are present. These substances are subject to surveys when used intentionally or if they are known to be contained in materials. (Example: chemSHERPA declarable substances)

3.4 Threshold limits, inclusion, and related topics

(1) Threshold limits

Threshold limits are the maximum limit of concentration of chemical substances contained in a homogeneous material.

- 1) A “homogeneous material” is a material that cannot be mechanically divided into separate materials.
- 2) “To divide mechanically” means to separate the material by mechanical means; for example, by unscrewing, cutting, crushing, grinding, or polishing.

(2) Contained (Inclusion)

The substance contained in raw materials or indirect materials due to intentional or unintentional addition, filling, mixing, or adhesion.

(3) Known inclusion

Refers to the state in which the inclusion of an Environmentally Hazardous Chemical Substance(s) is informed by a supplier or is confirmed based on some data.

(4) Intentional use

Refers to the intentional use of a chemical substance in a raw material, an indirect material, or when manufacturing other materials in order to realize specific characteristics, appearance, or quality. However, the case shall be excluded where the used substance is not present in a finished product.

(5) Compliance

Refers to the state in which regulated substances are not included, or the included amount is below the threshold limit.

(6) Impurity

An impurity is a substance contained in natural materials and not removable by current methods or techniques via refining processes; or a **chemical** substance unintentionally formed as a byproduct in synthesizing processes; or a **chemical** substance remaining unreacted and not removable by current methods or techniques.

4. Criteria for managing environmentally hazardous chemical substances

Refer to the related specification, “NAMICS Green Procurement Standards Environmentally Hazardous Chemical Substances List”.

5. Requirements for environmentally hazardous chemical substances

NAMICS requires its business partners to meet the following requirements:

When the vendor is not the manufacturer, NAMICS requires the manufacturer to meet the requirements. In this case, the manufacturer shall be in charge of the procedure required for the vendor in the following.

5.1 Guarantee of compliance

Guarantee the following about Product.

- 1) Regulated substances are not included, or the included amount is below the threshold limit.

5.2 Content of Environmentally Hazardous Chemical Substances and corrective action plan for abolition

(1) If the following applies, inform NAMICS of the content of the relevant substance and actions currently proposed to remove them **in form2**:

- 1) The products contain a regulated substance or a reduced substance.

(2) If the following applies, inform NAMICS of the content of the relevant substances:

- 1) The products contain managed substances **in form3**.

(3) If the following applies, inform NAMICS of all the contents of the relevant substances in an affected product(s) **in form3**.

- 1) The product(s) contains Cl **or** Br.

5.3 Request for collaboration in data measurements and audits

Regarding the previous sections 5.1 and 5.2, NAMICS may require business partners to submit measurement data. NAMICS may also ask the partner to perform **On-site and/or self-audits**.

5.4 Prior approval of changes

Submit written documents to NAMICS for approval before changing any of the following:

- (1) Raw materials used (constituents of products supplied by NAMICS business partners)
- (2) Composition
- (3) Manufacturing methods (processes), facilities, locations

5.5 Management by NAMICS business partners

Take the following measures as part of measures to comply with the requirements of the previous sections 5.1 to 5.4: (Refer to Section 6 below for more information.)

- (1) Green procurement of raw materials
- (2) Pre-shipment inspection of products as required
- (3) Both (1) and (2) above when changing suppliers

6. Requirements regarding establishment of a management system for environmentally hazardous chemical substances at NAMICS business partners

To promote green procurement, NAMICS imposes the following requirements to its business partners.

6.1 Environmental preservation efforts by business partners

- (1) NAMICS business partners must have obtained ISO 14001 certification or be in the process of doing so.
- (2) NAMICS business partners must take concrete steps to promote green procurement or have plans to do so.
- (3) If a NAMICS business partner has not received ISO 14001 certification, NAMICS asks that the partner take the following environmental measures that would meet ISO 14001 standards:
 - 1) Corporate philosophy
 - Establish a corporate philosophy on environmental preservation.
 - Establish a policy for environmental preservation and commit to continual improvement and prevention of pollution.
 - In the environmental policy, state a clear commitment to compliance with environmental laws and regulations.
 - Make sure the environmental policy is thoroughly communicated to all employees and available for review by third parties.
 - 2) Organization and plans
 - Set targets and objectives for environmental preservation.
 - Assign specific teams and persons in charge to achieve targets and objectives.
 - Develop action plans to achieve targets and objectives.
 - 3) Measures for environmental aspects
 - Manage and evaluate the following items below and seek to achieve improvements:
Air pollution, water pollution, noise and vibration, managed substances, and reductions in waste generation
Energy consumption (e.g., electricity, gas, fuel)
 - 4) Training, education, and provision of information
 - Provide training and education on environmental issues.
 - Provide training and education to personnel engaged in tasks that pose the risk of significant environmental impact.
 - Provide information to the public related to environmental preservation.

5) Rationalized distribution

- Work on reducing, reusing, recycling materials, and optimizing transportation.

6.2 Chemical in product management at NAMICS business partners

(1) Managing defective products

On identifying non-conforming products, clarify (identify and isolate) the corresponding lot and clearly separate it from conforming products to prevent accidental release of non-conforming products.

(2) Work management

In manufacturing processes (including secondary processes), always abide by work rules to avoid the production of non-conforming products.

(3) Managing materials and purchases

Set clear criteria when selecting raw materials and composition. Procure raw materials based on these criteria.

(4) Traceability

Retain shipping histories as records to allow tracing back to raw material lots. Be prepared to submit these records when requested to do so.

(5) Change management

Before changing raw materials, processes, or locations, assess the potential effects of the change to avoid the occurrence of unforeseen problems. Submit the Change Application Sheet (for supplier) to NAMICS and proceed only after obtaining approval from NAMICS.

7. Surveys

To promote green procurement, NAMICS undertakes surveys at regular and irregular intervals in accordance with the NAMICS Green Procurement Standards Document.

7.1 Objectives

The purpose of the survey is to confirm that the requirements set forth in the sections 5 and 6 are met.

7.2 Scope

The survey addresses products from NAMICS business partners when NAMICS or companies specified by NAMICS procure these products directly or through a third party for use as raw materials, indirect materials, or other materials.

7.3 Method

As part of the survey, NAMICS asks its business partners to respectively submit information on the presence of environmentally hazardous chemical substances in all products (procured from NAMICS business partners) used by NAMICS as raw materials, indirect materials, or other materials.

7.4 Documents to be submitted

(1) Receipt confirmation (Attached Form 1)

Return the receipt confirmation immediately after downloading and confirming the latest editions of the NAMICS Green Procurement Standards Document and Environmentally Hazardous Chemical Substances List of the NAMICS Green Procurement Standards from NAMICS website. (When the vendor is not the manufacturer, the manufacturer shall confirm the latest editions.)

(2) Compliance certificate (Attached Form 2)

Regarding the regulated substances specified in Environmentally Hazardous Chemical Substances List of the NAMICS Green Procurement Standards, if the substance(s) contained in your product complies with the threshold limit(s), select 'Compliance' under 'Category' of Product List, and submit only p.1 of Compliance Certificate.

If a regulated substance is contained in your product, select what applicable under ‘Category’ of Product List, report your view about the corrective action plan for their complete abolition in the following pages, and submit Compliance Certificate. (The corrective action plan shall include the counter-measures or alternative substances, etc. If their inclusion has to be continued, report the reason(s).)

If your product does not comply with NAMICS requirements, (2) of 8 of this Standard shall be applied.

(3) Analytical data

As supporting evidence, submit the results of analysis when issuing document (2) Compliance certificate above.

1) In principle, the data must have been acquired within one year preceding the date of issue of document (2).

2) Analytical methods shall follow international standards (IEC62321).

Substance name	Examples of test method / equipment
Cadmium, lead, mercury	ICP-OES, ICP-AES, ICP-MS
Hexavalent chromium	UV-VIS
PBBs and PBDEs	GC-MS
Phthalates	GC-MS

Each analytical detection limit shall comply with NAMICS’ guarantee-required value.

3) For inorganic materials and metal materials, total bromine measurements by XRF may be used for PBB and PBDE measurements.

4) Data must be obtained by third-party analysis or by in-house analysis meeting requirements equivalent to third-party analysis.

5) The analytical data must provide a full account of pretreatment methods and analysis flowcharts.

- Sample name
- Analysis date
- Analysis pretreatment and Test method
- Test result and detection limit of each analysis item
- Analytical flow chart

6) The substances to be analyzed are as follows:

- All the materials.
- Required items: Six substances of lead, mercury, cadmium, hexavalent chromium, PBBs, PBDEs and Four Phthalates of DEHP, BBP, DBP and DIBP.

(4) Chemical composition table and the global registration statuses (Attached Form 3)

1) The chemical composition table is required to clearly indicate composition.

2) Fill in the table so that the constituents total 100%.

List indirect materials categorized by parts. Make the total 100% per part.

3) Provide the following information on the Environmentally Hazardous Chemical Substances:

- Reference number

For the substance which is specified in the “Environmentally Hazardous Chemical Substances List of the NAMICS Green Procurement Standards”, provide the reference number specified in the List.

For the substance which is NOT specified in the Environmentally Hazardous Chemical Substances List, specify “Non-applicable” instead of providing the reference No.

- Scope of report

When it is already known that Environmentally Hazardous Chemical Substances are included regardless of whether it is intentional or unintentional, report all relevant substances even if the amount is below the threshold limit.

- CAS number
When the substance specified in “NAMICS Green Procurement Standards Environmentally Hazardous Chemical Substances List” has a CAS number, provide the number.
If there are components that do not fall into the category of environmentally hazardous chemical substances and whose CAS No. cannot be disclosed for reasons such as trade secret, please enter the necessary information in Form3 Supplement and submit it additionally.
- The included amount
When the included amount has a certain range, or it is not clear, provide “the maximum amount estimated based on design”
- Classification of inclusion and its application/purpose
Provide all reasons for the inclusion of the Environmentally Hazardous Chemical Substances, including whether the inclusion is intentional or unintentional, or whether it is contained as an impurity, etc.
- Information of Halogen inclusion
Following the requirement of 3.2, provide all the information of Cl and Br intentionally or unintentionally included in an affected product(s). Regarding how to specify their amounts, please refer to ‘The included amount’ above.

4) Provide the global registration statuses in the existing chemical substances lists so that NAMICS can judge whether it is possible to export an affected product.

When the Application/ Purpose of inclusion is “impurity”, its global registration statuses do not have to be considered. It is also unnecessary to provide the registration statuses of indirect materials, since they are not subject to the survey.

When there is a country to which the export of an affected product is impossible because the relevant substance is not registered in their list, inform NAMICS of whether you will cooperate with us when we need to declare the substance to the country in the future.

5) Provide information on the country of origin to verify an affected product under the US Export Administration Regulations (EAR).

(5) SDS (Safety Data Sheet)

1) Submit SDS (Safety Data Sheet) in a form that meets the requirements of JIS Z 7253 in principle.

(6) chemSHERPA

chemSHERPA, which is an information transfer scheme developed by Ministry of Economy, Trade and Industry for the chemical substances in products throughout supply chain, is also required if document (2) Compliance certificate above is issued to clarify the details of substances contained in products. List all known substances intentionally or unintentionally contained in products.

1) Check to confirm that you have the latest revision before using chemSHERPA. You can download the latest version at the following link:

<https://chemsherpa.net/english/tool>

2) When you create chemSHERPA, pay attention to the following.

- When raw materials and others are subject to the survey, use the chemical data entry support tool (chemSHERPA-CI), and submit the chemSHERPA in both of a shci file and a PDF file converted from an excel sheet
- When indirect materials are subject to the survey, use the molded item data entry support tool (chemSHERPA-AI), and submit it in shai file.

3) Submit chemSHERPA, created using the data entry support tool. The version of the tool shall be the latest at your receiving our requirement.

7.5 Submission time

*1 Either of 'Chemical composition table and Global registration status' or 'chemSHERPA' are/is acceptable.

*2 If the CAS No cannot be disclosed, an additional survey response is required in Form3 Supplement.

- (1) NAMICS requires new business partners to submit all documents at least once.
- (2) "At regular survey" refers to responses submitted for the annual regular survey. The results of the previous or before the previous survey are not acceptable. Ensure that you conduct the survey at every annual survey, and submit the latest results.
- (3) "As required" refers to the following cases:
 - 1) If the relevant laws and regulations are revised and the revision requires this action
 - 2) If chemSHERPA declarable substances are revised and the revision requires this action
 - 3) If any of the below applies and any change is implemented
 - Previous section 5.4, Prior approval of changes
 - Previous section 5.5, Management by NAMICS business partners
 - 4) Other cases in which NAMICS or business partners perceive a need

8. Measures in response to survey results

NAMICS will act as follows if it has concerns regarding the previous section 7.4:

- (1) If the Compliance certificate (Attached Form 2) cannot be issued, NAMICS will require its business partners to provide the document(s) which they can submit. Then NAMICS will make a decision after consulting with the relevant business partner to determine if alternative substances present technical obstacles.

NAMICS Green Procurement Standards Compliance certificate

We guarantee that the delivered products satisfy the latest NAMICS Green Procurement Standards with the following Category.

- **Compliance** : All Level 1 and Level 2 substances in the product meet the threshold limit (the maximum allowable concentration).
- **Conditional compliance** : The product contains all Level 1 substances within the threshold limit, but contains Level 2 substances over the threshold limit.
We will strive to implement countermeasures as described in "2-Report the details of substance usage".
- **Non compliance** : The product contains Level 1 substances over the threshold limit. Or the product contains all Level 1 substances within the threshold limit (the maximum allowable concentration), but contains Level 2 substances over the threshold limit.
Furthermore, for the reasons stated in "2-Report the details of substance usage", it cannot be avoided to use these substances.
We will maintain the present status.

※ Please fill in the parts in yellow.

● How to fill in Form 2 (1) Fill in product name(s) in Product List.

(2) Check the compliance status to 'NAMICS Green Procurement Standards Environmentally hazardous chemical substances list', fill in 'Category' in Product List.
※When the 'Category' is 'Compliance', no action is needed for the following (3).

(3) Fill in 'Result' of 1-1 and 1-2 respectively in the following pages.
When a product contains any regulated substance over the threshold limit (maximum limit of concentration), select "Non compliance" under 'Result'. Then report the detailed information in '2. Report the details of substance usage'.
When a product is out of Scope, select "Not applicable" under 'Result'.
When more than one product are surveyed and their results include "Non compliance" and "Not applicable", select "Non compliance" under 'Result'.

(4) A person in charge at your company shall sign in the signature space below. Then submit this form to NAMICS.

※If the compliance status to 'NAMICS Green Procurement Standards Environmentally hazardous chemical substances list' is already checked otherwise, and the Category is 'Compliance', it is not necessary to submit after page 2.

1,2-Benzenedicarboxylic acid, di-C7-11-branched and linear alkyl esters (DHNUP)	68515-42-4
Bis-(2-methoxyethyl) phthalate (DMEP)	117-82-8
Other phthalates	-

Appendix-2.2 List of Boric acid, Specific sodium borates

物質名	CAS No.
Boric acid	10043-35-3 11113-50-1
Sodium tetraborate pentahydrate	12179-04-3
Disodium tetraborate, anhydrous	1330-43-4
Sodium tetraborate decahydrate	1303-96-4
Tetraboron disodium heptaoxide, hydrate	12267-73-1

Appendix-2.3 Acrylates monomers Group2

物質名	CAS No.
Dicyclopentanyl Methacrylate (DCPM)	34759-34-7
Cyclic trimethylol-propane formal acrylate (CTFA)	66492-51-1
2-hydroxyethyl acrylate (HEA)	818-61-1
2(2-Vinylxyethoxy)ethyl acrylate (VOEEA)	86273-46-3
Dodecyl acrylate (DDA)	2156-97-0
Decamethyleneglycol diacrylate (DMGDA)	13048-34-5
1,12-Dodecanediol dimethacrylate (DDDMA)	72829-09-5
Isopropylidene glycerol acrylate (IPGA)	13188-82-4
Tricyclododecane dimethanol diacrylate (TCDDMDA)	42594-17-2
Benzyl acrylate (BZA)	2495-35-4
Methyl phenylglyoxalate; Methyl benzylformate (MBF)	15206-55-0
Polyethylene glycol methacrylate (PEGMA)	25852-47-5
Glycerol, propoxylated, esters with acrylic acid (GPTA)	52408-84-1
3,3,5-Trimethylcyclohexyl acrylate (TMCHA)	86178-38-3
N-vinylcaprolactam (NVC)	2235-00-9
Hexyl acrylate (HA)	2499-95-8
Tridecyl acrylate (TDA)	3076-04-8
4-Acryloylmorpholine (ACMO)	5117-12-4
Butyl acrylate (BA)	141-32-2
tert-Butyl acrylate (TBA)	1663-39-4
Isobutyl acrylate (IBA)	106-63-8
Acrylic acid (AA)	79-10-7
Isodecyl acrylate (IDA)	1330-61-6

物質名	CAS No.
Ethyl trimethylbenzoyl phenylphosphinate (ETBPP)	84434-11-7
2-Ethylhexyl acrylate (EHA)	103-11-7
Methyl acrylate (MA)	96-33-3
Urethane dimethacrylate (UDMA)	72869-86-4
N,N-Dimethylacrylamide	2680-03-7
Isobutyl methacrylate (IBMA)	97-86-9
Ethyl acrylate (EA)	140-88-5

Appendix-2.4 Alkylphenol Ethoxylates and Alkylphenols(APEO/AP)

物質名	CAS No.
Nonylphenol	25154-52-3
Octylphenol	27193-28-8
Polyethylene glycol nonylphenyl ether	9016-45-9
Polyethylene glycol mono(4-nonylphenyl) ether	26027-38-3
Ethoxylated isononylphenol	37205-87-1
Poly(oxy-1,2-ethanediyl), α -(4-nonylphenyl)- ω -hydroxy-, branched	127087-87-0
Poly(oxy-1,2-ethanediyl), α -(nonylphenyl)- ω -hydroxy-, branched	68412-54-4
Polyethylene glycol mono(4-tert-octylphenyl) ether	9002-93-1

Appendix-2.5 Bisphenols

物質名	CAS No.
4,4'-Methylenebis(phenol) (Bisphenol F)	620-92-8
4,4'-oxybisphenol	1965-09-9
4,4'-bisphenol (BP4,4')	92-88-6
Bisphenol A	80-05-7
Bisphenol AF (BPAF)	1478-61-1
Bisphenol AP (BPAP)	1571-75-1

cis-1,2-Dichloroethylene	156-59-2
trans-1,2-Dichloroethylene	156-60-5
Tetrachloroethylene	127-18-4
Trichloroethylene	79-01-6

Appendix-2.7 N-Nitrosamines

物質名	CAS No.
N-Nitrosodibutylamine	924-16-3
N-Nitrosodiethanolamine	1116-54-7
N-Nitrosodiethylamine	55-18-5
N-Nitrosodiisopropylamine	601-77-4
N-Nitrosodimethylamine	62-75-9
N-Nitrosodiphenylamine	86-30-6
N-Nitrosodipropylamine	621-64-7
N-Nitrosoethylphenylamine	612-64-6
N-Nitrosomethylethylamine	10595-95-6
N-Nitrosomethylphenylamine	614-00-6
N-Nitrosomorpholine	59-89-2
N-Nitrosopiperidine	100-75-4
N-Nitrosopyrrolidine	930-55-2

Appendix-2.8 Solvents

物質名	CAS No.
Carbon disulfide	75-15-0
Dimethylformamide	68-12-2
2-Ethoxyethyl acetate	111-15-9
2-Ethoxyethanol	110-80-5
Ethylene glycol monomethyl ether acetate	110-49-6
2-Methoxyethanol	109-86-4
N-Methyl-2-pyrrolidone	872-50-4
Toluene	108-88-3
Trichloroethylene	79-01-6
o-Xylene	95-47-6
m-Xylene	108-38-3
p-Xylene	106-42-3

Phenylisocyanate	103-71-9

Appendix-3.6 Glycidyl ether monomers

物質名	CAS No.
Allyl glycidyl ether	106-92-3
1,4-Butanediol diglycidyl ether	2425-79-8
2,2'-(Oxybis(methylene))bis[oxirane]	2238-07-5
Bisphenol A diglycidyl ether	1675-54-3
Glycidyl neodecanoate	26761-45-5
1,6-Hexanediol diglycidyl ether	16096-31-4
2-[(1-Methylethoxy)methyl]oxirane	4016-14-2
Butyl glycidyl ether	2426-08-6
Oxirane, 2-[(C8-10-alkyloxy)methyl] derivs.	68609-96-1
Phenyl glycidyl ether	122-60-1
p-tert-Butylphenyl glycidyl ether	3101-60-8
Glycerol triglycidyl ether	13236-02-7

Appendix-3.7 Acrylates monomers Group3

物質名	CAS No.
Isobornyl methacrylate (IBOMA)	7534-94-3
Isodecyl methacrylate (IDMA)	29964-84-9
Isopropylidene glyceryl methacrylate (IPGM)	7098-80-8
2-Hydroxypropyl methacrylate (HPM)	27813-02-1
N,N-diethylacrylamide (DEAA)	2675-94-7
1,6-hexanediyl bismethacrylate (HDBMA)	6606-59-3
2-[2-(2-ethoxyethoxy)ethoxy]ethyl methacrylate (EEEEEM)	39670-09-2
2,3-dihydroxypropyl methacrylate (DHPMA)	5919-74-4
Magnesium acrylate	5698-98-6
Trimethylolpropane trimethacrylate	3290-92-4

Form 3 Supplement

This is to request you to submit additionally if detail information such as CAS No. cannot be provided in Sheet3 "Chemical Composition Table and Global Registration Status".

Foreign countries are not only established current chemical substance inventory system
 Even if a chemical substance is not regulated by domestic law, there are many cases
 in which we are obligated to provide information to the importer when distributing the substance locally.

In order to realize distribution in accordance with the legal obligations and requirements of each country,
 please answer the following questions regarding compliance with each country's regulations for ingredients
 for which detailed information is difficult to disclose.

Product Name

Reduced Substances	R002	Other phthalates (Exemption-Regulated Substances)
Reduced Substances	R003	Boric acid, Specific sodium borates
Reduced Substances	R004	4-(1,1,3,3-tetramethylbutyl) phenol
Reduced Substances	R005	Bis(2-methoxyethyl) ether
Reduced Substances	R006	N,N-dimethylacetamide (DMAC)
Reduced Substances	R007	Ethylene glycol dimethyl ether (EGDME)
Reduced Substances	R008	Trixylyl phosphate (TXP)
Reduced Substances	R009	2-ethylhexyl 10-ethyl-4,4-dioctyl-7-oxo-8-oxa-3,5-dithia-4-stannatetradecanoate (DOTE)
Reduced Substances	R010	Reaction mass of 2-ethylhexyl 10-ethyl-4,4-dioctyl-7-oxo-8-oxa-3,5-dithia-4-stannatetradecanoate and 2-ethylhexyl 10-ethyl-4-[[2-[(2-ethylhexyl)oxy]-2-oxoethyl]thio]-4-octyl-7-oxo-8-oxa-3,5-dithia-4-stannatetradecanoate (reaction mass of DOTE and MOTE)
Reduced Substances	R011	REACH SVHC
Reduced Substances	R012	Acrylates monomers Group2
Reduced Substances	R013	Alkylphenol Ethoxylates and Alkylphenols(APEO/AP)
Reduced Substances	R014	Bisphenols (Bisphenol A, Bisphenol F, Bisphenol S)
Reduced Substances	R015	Diphenylamine
Reduced Substances	R016	n-Hexane
Reduced Substances	R017	Chlorinated organic solvents
Reduced Substances	R018	Halogenated flame retardants
Reduced Substances	R019	Epichlorohydrin
Reduced Substances	R020	2-Phenyl-2-propanol
Reduced Substances	R021	Diphenylthiourea
Reduced Substances	R022	Estragole
Reduced Substances	R023	Hexamethylenetetramine
Reduced Substances	R024	Mercaptobenzothiazole (2-MBT)
Reduced Substances	R025	Methyl phenylglyoxylate
Reduced Substances	R026	2-Aminoethanol
Reduced Substances	R027	Methacrylates
Reduced Substances	R028	N-Nitrosamines
Reduced Substances	R029	Solvents
Reduced Substances	R030	Organic fluorine compounds (Exemption-P2003)
Regulated Level	Reference No.	Substances Name
Managed Substances	M002	Other Polycyclic aromatic hydrocarbons (PAHs)
Managed Substances	M003	Antimony and its compounds
Managed Substances	M004	Bismuth and its compounds
Managed Substances	M005	Other brominated organic compounds

Managed Substances	M006	Other chlorinated organic compounds
Managed Substances	M007	Cobalt and its compounds
Managed Substances	M008	Inorganic Fluorine Compounds
Managed Substances	M009	Iodine and its compounds excluding the regulated substances specified by these standards
Managed Substances	M010	chemSHERPA Declarable Substance Ver. (latest Version) excluding the regulated substances specified by these standards
Managed Substances	M011	Low molecular siloxane (≤ 20 mer)
Managed Substances	M012	Nanomaterials (Particle size : 1~100nm)
Managed Substances	M013	Phosphorus and its compounds
Managed Substances	M014	Cyan compounds
Managed Substances	M015	Sulfur and its compounds
Managed Substances	M016	Zinc and its compounds
Managed Substances	M017	Titanium and its compounds
Managed Substances	M018	Volatile organic compounds (VOCs)
Managed Substances	M019	Rare metal
Managed Substances	M020	TSCA Priority chemicals (20 High-Priority Substances)
Managed Substances	M021	Barium and its compounds
Managed Substances	M022	Chromium, extractable (Excluded : Hexavalent chromium)
Managed Substances	M023	Isocyanates (monomers)
Managed Substances	M024	Nickel and its compounds
Managed Substances	M025	Mica
Managed Substances	M026	Gold, Tin, Tantalum and Tungsten (other than P1030)
Managed Substances	M027	Benzyl Alcohol
Managed Substances	M028	Glycidyl ether monomers
Managed Substances	M029	Aluminum and its compounds
Managed Substances	M030	Lithium and its compounds
Managed Substances	M031	Magnesium and its compounds
Managed Substances	M032	Copper and its compounds
Managed Substances	M033	Acrylates monomers Group3
Managed Substances	M034	Mineral oil aromatic hydrocarbons (MOAH) comprising 1 to 7 aromatic rings
Managed Substances	M035	Mineral oil aromatic hydrocarbons (MOAH) comprising 3 to 7 aromatic rings
Managed Substances	M036	Mineral oil saturated hydrocarbons (MOSH) with 16 to 35 carbon atoms

NAMICS Green Procurement Standards_Revision Records

Revision No.	Established/ Revised on	Revision	Reason for revision	Established/ Revised by
9	2012/11/30	To add the environmental policy. To review the overall structure.	To make the contents more easily understood.	QA Div.
10	2014/9/19	5 To add the explanation about the case where the vendor is not the manufacturer.	To make the procedures match with actual operations.	QA Div.
		7.4(1) To add the explanation about the case where the vendor is not the manufacturer.		
		7.4(5) 4) To add the explanation about reference No.		
		6.2(6) Change control --> Change management process change notice (PCN) --> Change Application Sheet (for supplier)	To correct an error.	
		7.4 (6) Set of SDS and MSDSplus --> (6) SDS, (7) MSDSplus	To separate the section (6), 7.4 to (6) SDS and (7) MSDS plus based on the review of the List.	
		7.4(7) 3) To add 3) under (7), 7.4.	To ensure that a vendor submits the latest MSDSplus.	
		7.4(7) 4) To add 4) under (7), 7.4.	When the item subject to survey is an indirect material, to require a vendor to submit a necessary document, following the actual operation.	
		7.5 To review the list.	To require a vendor to submit MSDSplus. To require a vendor to submit Attached Form 4 (Chemical composition table) only when there is any change.	
		7.5(2) To add a few explanations.	To have a vendor understand the point of the survey.	
To revise Attached Form 2 Non-inclusion Certificate. (To add Analysis data check items.)	To make the status of Analysis data clearer.			
11	2016/4/25	3.3(1) To add a few explanations.	To specify the requirements.	QA Div.
		3.3(2) To add new regulated level: "Reduced Substances"		
		3.4 To add some definition of terms		
		7.4(2) Overall revisions	Review "Attached Form 2"	
		7.4(3) Overall revisions	Review "Attached Form 3"	
		7.5 To review the list.	To require a vendor to submit Attached Form 3 (Chemical composition table and Global registration status) .	
		Revise the related specification name to "NAMICS Green Procurement Standards Environmentally Hazardous Chemical Substances List"	In order to follow Definition of Terms in "NAMICS Green Procurement Standards Document".	
		Review various Attached Forms.	In order to increase the consistency with requirements of "NAMICS Green Procurement Standards Document".	
12	2017/6/16	3.2(3) To add "Halogen-free" in Definition of terms.	To specify the requirements about Cl and Br.	QA Div.
		5.2(3) To add a case subject to report.		
		7.4 (3) To add Phthalates as analysis items.	To prepare for the revision of the restricted substances under RoHS Directive.	
		7.4(6) Overall revisions	As "chemSHERPA" is introduced as a submission-required document.	
		7.5 To revise the list based on the review.		

Revision No.	Established/ Revised on	Revision	Reason for revision	Established/ Revised by
13	2018/6/29	7.4 (3) To add Phthalates as mandatory analysis items for raw materials and other materials.	To prepare for the revision of the restricted substances under RoHS Directive.	QA Div.
		7.4(6) To delete MSDSplus from documents to be submitted.	To completely shift to chemSHERPA.	
14	2019/6/28	To delete 3.4 (7) High-precision analysis.	To summarize analysis-related requirements in 7.4 (3).	QA Div.
		7.4(3) To revise some parts about analysis requirements.	To conform to current requirements.	
		7.4(3) To make the substances subject to analysis for raw materials and those for indirect materials same.	As the link to download chemSHERPA was updated.	
		7.4(6) To revise the link to download chemSHERPA.	To conform to current requirements.	
		7.4(6) To revise what need to be paid attention when creating chemSHERPA.	Based on the review of necessary information.	
15	2020/6/30	7.4(1) , 9.2(2) To revise the way of distributing NAMICS Green Procurement Standards Document.	As NAMICS Green Procurement Standards Document started to be posted in NAMICS website.	QA Div.
		16	2021/7/30	Contents To revise wording.
3.3(1) Overall revisions.	Based on the review of Form 2.			
3.4(6) To revise impurity's definition.	To make the description more specific.			
5.1 Overall revisions.	Based on the review of Form 2.			
5.2(1)1) Overall revisions.				
7.4(2) To revise some explanations about Form 2.				
17	2022/6/30	7.4(4)5) To add a relevant law.	Based on the review of Form 3.	QA Div.
		To revise Form2 and Form3	Based on the review of "NAMICS Green Procurement Standards Environmentally hazardous chemical substances list".	
18	2023/8/1	5.2 (1) To revise wording.	To correct typos	QA Div.
		6.2 To revise wording.	To clarify the target	
		7.4 (3) To revise method of requirements test data	To meet the latest analytical requirements	
		7.5 To revise required documents	To match the current situation	
		To revise Form2 and Form3	Based on the review of "NAMICS Green Procurement Standards Environmentally hazardous chemical substances list".	

19	2024/9/1	1.2 To add Quality / Chemical in Product Management Policy	To add content on the Chemical in Product Management Policy within procurement standards.	QA Div.
		2 Overall revisions.	To add content on the Chemical in Product Management Policy within procurement standards.	
		5.2 To add reporting form name.	To clarify the forms to be reported.	
		7.4 (4) , 7.5 To add request for Form3 Supplement	To add survey form.	
		7.4(4) , 7.5, 8, 9.1 To delete request for Form 4	To delete survey form.	
		To revise Form2 and Form3	Based on the review of "NAMICS Green Procurement Standards Environmentally hazardous chemical substances list".	
	To add Form3 Supplement To delete Form4	To review operations
